## **Technical Data**

## Notes

The degree of protection specified (IP code) applies only to a properly closed cover and the use of an equivalent connector.

The switch may not be used as a mechanical stop.

Radial actuation may reduce the mechanical life.

The min. radius refers to a pivot at the top of the cap (S0).

Tapped holes not in use must be closed with blind plugs.

For use with the described ambient temperature, the plug and cable (fixed or flexible installation) must be suitable for at least the same temperature range.

The plug must not be connected and disconnected under voltage.

The mechanical life of the cable box are 500 cycle of operation.

To comply with the approvals need to use proper plugs and cables.
