Actuation
<p>The actuating device is preferably started from 2 sides.                      By lifting the clamp the actuation assembly can be rotated in 45° increments such that 16 actuation directions are possible.                      The actuation assembly is to be again fastened to the housing by lowering the clamp.</p>
