Notes	
<p>The degree of protection specified (IP code) applies only to a properly closed cover and the use of an equivalent connector. The connector and the cable (fix or flexible mounted) must at least be suitable for the described ambient air temperatures. The connector must not be connected or disconnected when voltage is applied. The mechanical life of the connector is 100 connection cycles.</p> <p>The information on the switching travel can be found in the data sheets of the actuator, as these depend on the actuator used.</p> <p>Approvals / properties applies only to the fully assembled device.</p>
