#### **General details**

Repeatability of switching points is  $\pm 0,05$  mm based on the same geometrical conditions as of a switch device.

The measures of the switching points refer to a fluid-density of 1 g/cm<sup>3</sup>.

The tolerance of the switching points is  $\pm 2$  mm

Pay attention to the contact protection, when switching inductive or capacitive loads. Maximum data must not be exceeded! Operate only at safe voltage sources!
